## Pre-Surgical Bloodwork:

We recommend a pre-surgical blood chemistry panel on all pets prior to surgery. Abnormalities may increase surgical risk. If all the tests are normal, it does not guarantee that your pet will not have an anesthetic reaction, but it does tell us that your pet is healthy and in a low risk category.

- For pets UNDER 7 years of age, the cost for this profile is **\$133.00**.
- For pets OVER 7 years of age, the cost for this profile is **\$175.00**.

**PLEASE INITIAL:**    \_\_\_\_\_ **YES**, I want the blood panel                    \_\_\_\_\_ **NO**, I do not want the blood panel

## Pain Management:

Injectible and oral pain medication is available for your pet. Patients with proper pain management can recover quicker and with fewer complications. **\*\*Pets over 50 pounds may have additional cost (+ \$20-50)\*\*** \_\_\_\_\_

**PLEASE INITIAL:**    \_\_\_\_\_ **YES**, I want surgical pain medication/injection    (The cost is \$25-50)

\_\_\_\_\_ **YES**, I want post-surgical pain medication    (The cost is \$25-50)

When possible, do you prefer? Liquid \_\_\_\_\_

Tablet \_\_\_\_\_

\_\_\_\_\_ **NO**, I decline both pain options for my pet.

\_\_\_\_\_ If my pet is in **heat, pregnant or has an abnormal uterus**, I understand there is an additional **\$35.00 to \$75.00** fee in addition to the surgery cost.

\_\_\_\_\_ If my pet has retained baby teeth, I authorize the extraction of these teeth. If not extracted, these teeth can cause significant dental disease. These fees can range from **\$20 to \$50** depending on the number of retained teeth present.

\_\_\_\_\_ If my pet is found to have **fleas** or **ticks**, I understand they **will be treated** at my expense.

\_\_\_\_\_ **FOR DENTALS:** I authorize the **extraction** of any teeth the doctor feels need to be removed. I understand there will be additional cost for these extractions. These fees can range from **\$50.00 to \$200.00**.

\_\_\_\_\_ Initial here if we can use your pet on social media.
